🌐 [Portfolio](#)

Profile

Motivated and detail-oriented entry-level Data Analyst with a strong foundation in data analysis, statistical analysis, machine learning, and data visualization. Skilled in Python, SQL, Microsoft Power BI, and Excel for cleaning, analysing, and presenting data to support business decision-making. Experienced in exploratory data analysis, predictive analytics, dashboard development, and transforming complex datasets into meaningful insights. Strong analytical, problem-solving, and communication skills with the ability to adapt quickly and contribute effectively in collaborative environments.

Areas of Expertise

Data Analysis- Data Visualization- Statistical Analysis- Predictive Analytics- Python- Big Data Technologies- Machine Learning- Artificial Intelligence- Deep Learning- Data Preprocessing- Computer Vision- Neural Networks- Model Deployment and Monitoring- Software Development Life Cycle (SDLC)- Object-Oriented Programming (OOP)- Java- Reinforcement Learning

Experience

Working on attendance marking system

Karunya University 06/2023 - 01/2024

- Collaborated with other students on developing an improvement on the facial recognition Systems using SNN models

Working on deep learning based security for internet of drones

Karunya University 10/2024 - 04/2025

- Collaborated with other students on developing an security system for internet of drones that alerts the users when there is a propable security attack

Projects

Insurance Retention Prediction and Visualization [GitHub](#)

- Performed exploratory data analysis, feature engineering, missing value handling, and statistical analysis using Python and Scikit-learn.
- Built Random Forest and XGBoost models to predict insurance retention ratio and analyse business trends.
- Developed an interactive Power BI dashboard to visualise retention trends, premium metrics, and business insights for decision-making.

Pizza Sales Dashboard [GitHub](#)

- Developed an interactive Power BI dashboard to analyse sales performance, business KPIs, and order trends.
- Used SQL to clean, transform, and aggregate data for reporting and business insights.
- Implemented interactive filters and drill-through functionality to support data exploration and decision-making.

Data Analyst Jobs Analysis [GitHub](#)

- Analysed job posting datasets to identify in-demand skills, technologies, salary trends, and hiring patterns.
- Built an interactive Power BI dashboard with filtering and drill-down capabilities for exploratory analysis.
- Used SQL and data visualisation techniques to transform raw datasets into actionable business insights.

Online Courses & Certifications

- Intro to Machine Learning (Oct. 2023)
- Pandas (Aug. 2023)
- Data Visualization (Aug. 2023)
- Data Cleaning (Oct. 2023)
- Getting Started with decision tress (Oct. 2023)

- Introduction to Cybersecurity - Cisco NetAcad (2024)
- Cybersecurity Essentials - Cisco NetAcad (2024)
- Introduction to Packet Tracer - Cisco NetAcad (2024)
- Big Data Computing - NPTEL Online Certification
- Introduction to Industry 4.0 and Industrial Internet Of Things - NPTEL Online Certification
- Technical English for engineers - NPTEL Online Certification
- Virtual Internship Program In Cybersecurity - CISCO Virtual Internship

Education

Karunya University	B.Tech (CSE) Specialized in AI ML	Coimbatore, Tamil Nadu	2021-2025
D.B.H.S.S	Higher Secondary Education	Thachacmpara, Kerala	2019-2021
M.E.T.E.M.H.S.S	SSLC	Mannarkkad, Kerala	2018-2019

Skills

- **Data Analysis & Visualization:** Microsoft Power BI, Docker, Apache-Airflow, Excel, Python, Pandas, NumPy, Scikit-learn
- **Software & Tools:** MySQL, Python, PowerPoint, Canva, TensorFlow
- **Soft Skills:** Presentation, Planning, Organized, Creative Problem-Solving, Teamwork, Active Listening, Adaptability, Analytical Thinking
