Profile

Motivated and detail-oriented Data Analyst with a strong foundation in data analysis, statistical analysis, machine learning, and data visualization. Skilled in Python, SQL, Microsoft Power BI, and Excel for cleaning, analyzing, and presenting data to support business decision-making. Experienced in exploratory data analysis, predictive analytics, dashboard development, and transforming complex datasets into meaningful insights. Strong analytical, problem-solving, and communication skills with the ability to adapt quickly and contribute effectively in collaborative environments.

Projects

Zomato Data Analytics Pipeline

- Built an end-to-end Zomato analytics pipeline using Snowflake, dbt, and Apache Airflow to automate data ingestion, transformation, and analytics workflows.
- Designed staging, dimensional, incremental fact, and mart models in dbt, transforming raw CSV data into structured Snowflake datasets for analytical reporting.
- Integrated Gemini-powered review enrichment and natural-language SQL/RAG tools to analyze customer reviews, sentiment, topics, and generate data-driven insights.

Insurance Retention Prediction and Visualization

- Performed exploratory data analysis, feature engineering, and statistical analysis using Python and Scikit-learn, leveraging automated scripts to streamline recurring data-cleaning tasks.
- Built Random Forest and XGBoost models to predict insurance retention ratio and analyze business trends.
- Developed an interactive Power BI dashboard to visualize retention trends, premium metrics, and business insights for decision-making.

Pizza Sales Dashboard

- Developed an interactive Power BI dashboard to analyze sales performance, business KPIs, and order trends.
- Utilized SQL to clean, transform, and aggregate complex datasets, implementing AI-assisted query optimization for efficient reporting.
- Implemented interactive filters and drill-through functionality to support data exploration and decision-making.

Data Analyst Jobs Analysis

- Analyzed job-posting datasets to identify in-demand skills, technologies, salary trends, and hiring patterns.
- Built an interactive Power BI dashboard with filtering and drill-down capabilities for exploratory analysis.
- Used SQL and data visualization techniques to transform raw datasets into decision-ready insights and present findings for data-driven decisions.

Deep Learning Based Security for Internet of Drones

- Collaborated with other students to develop a security system for the Internet of Drones that alerts users when a probable security attack is detected.
- Monitored and maintained automated ETL pipelines to ensure seamless data synchronization from source databases to reporting environments, improving overall data freshness.

Facial Recognition Attendance System

- Developed an attendance tracking system using SNN models for automated facial recognition and attendance management.

Education

Karunya University	2025
<i>B.Tech in Computer Science and Engineering – Specialized in Artificial Intelligence Coimbatore, Tamil Nadu and Machine Learning</i>	
D.B.H.S. Higher Secondary Education	2021
	<i>Thachampara, Kerala</i>
M.E.T.E.M.H.S.S – SSLC	2019
	<i>Mannarkkad, Kerala</i>

Online Courses & Certifications

• Intro to Machine Learning – NPTEL Online Certification	Oct. 2023
• Pandas – NPTEL Online Certification	Aug. 2023
• Data Visualization – NPTEL Online Certification	Aug. 2023
• Data Cleaning – NPTEL Online Certification	Oct. 2023
• Getting Started with Decision Trees – NPTEL Online Certification	Oct. 2023
• Introduction to Cybersecurity – Cisco NetAcad	2024
• Cybersecurity Essentials – Cisco NetAcad	2024
• Introduction to Packet Tracer – Cisco NetAcad	2024
• Big Data Computing – NPTEL Online Certification	
• Introduction to Industry 4.0 and Industrial Internet of Things – NPTEL Online Certification	
• Technical English for Engineers – NPTEL Online Certification	
• Virtual Internship Program in Cybersecurity – Cisco Virtual Internship	

Technical Skills

Programming	Python, Java, SQL, Object-Oriented Programming (OOP)
Data Analysis	Pandas, NumPy, Scikit-learn, Statistical Analysis, Data Preprocessing, Exploratory Data Analysis
Data Visualization	Microsoft Power BI, Excel, PowerPoint, Data Visualization, Streamlit
Databases	MySQL, SQL
Machine Learning	Machine Learning, Predictive Analytics, Random Forest, XGBoost, Decision Trees, Reinforcement Learning, RAG
AI / Deep Learning	Artificial Intelligence, Deep Learning, Neural Networks, Computer Vision, TensorFlow, SNN Models,
Data Engineering	Apache Airflow, Docker, Big Data Technologies, ETL Pipelines, snowflake, AWS S3
Development	SDLC, Model Deployment and Monitoring
Design / Presentation	Canva, PowerPoint, Presentation

Soft Skills

Analytical Thinking	—	Creative Problem-Solving	—	Teamwork	—	Adaptability	—	Active Listening	—	Planning	—	Organization	—	Presentation
---------------------	---	--------------------------	---	----------	---	--------------	---	------------------	---	----------	---	--------------	---	--------------

Languages

Malayalam	Native
English	Fluent
Hindi	Intermediate
Tamil	Basic
